Professional Summary

Currently pursuing B.Tech in Computer Science and Engineering with a background in computer science, knowledge about Web development. Quick learner with a strong desire to grow and contribute to innovative projects in a collaborative environment.

Education

Degree/Certificate	Institute/Board	Location	Year
B.Tech. Major	Dr. C V Raman University	Vaishali, Bihar	2022-Present
Senior Secondary	BSEB	Patna, Bihar	2022
Secondary	CBSE	New delhi	2020

Skill

- **Programming Skills:** C Language, C++, Basic Java, Basic Python, HTML, CSS, JavaScript.
- **Tools/Frameworks:** MongoDB, Git&GitHub, etc.
- **Soft Skills:** Team Management, Professional Communication, Analytical and Problem Solving Skills

Projects

- **Menu Slide Using only Html & CSS**
  - The project creates a **sliding navigation menu** using only HTML for structure and CSS for animation.
  - **CSS transitions and transforms** are used to slide the menu in and out smoothly without JavaScript.
  - The layout includes a **hamburger icon**, menu panel, and navigation links styled with pure CSS.
  - Demonstrates understanding of **CSS animations, positioning, and responsive design** techniques..
- **Clone website Using only Html & CSS**
  - The project recreates the layout and design of an existing website using only HTML and CSS.
  - **HTML** is used to build the structure: header, navbar, sections, images, footer, etc.
  - **CSS** handles all styling like colors, fonts, spacing, alignment, and responsive layout.
  - Helps understand **webpage structure**, **CSS positioning**, **flexbox/grid**, and **responsive design**.

- Useful for improving front-end skills by analyzing and recreating real-world website designs.

- **Calculator Using Html, CSS & JS**
  - HTML is used to create the structure of the calculator (buttons + display screen).
  - **CSS** provides styling, layout, colors, and makes the calculator look clean and responsive.
  - **JavaScript** handles all the logic like button clicks, calculations, and updating the display.
  - Supports basic operations: **Addition, Subtraction, Multiplication, Division**.
  - Includes essential functions like **Clear (AC)**, **Delete (DEL)**, and **Decimal input**.
  - Fully interactive, lightweight, and works on any web browser.

- **Food Order Using Html, CSS & JS**
  - The project is a simple food ordering website where users can browse items and place an order.
  - **HTML** is used to create the structure: menu items, images, buttons, and order form.
  - **CSS** provides styling, layout, colors, fonts, and makes the UI attractive and responsive.
  - **JavaScript** handles dynamic features like adding items to cart, calculating total price, and form validation.
  - Includes sections like **Home, Menu, About, Contact**, and an **Order Form**.
  - Helps understand **DOM manipulation**, **event handling**, and **interactive UI design**.

- **Pilgrim website Using Html, CSS, JS, Ejs & MongoDB**
  - The project is a pilgrim information and booking website where users can explore holy places and submit inquiries or bookings.
  - **HTML & CSS** are used to design the front-end structure and create a clean, responsive user interface.
  - **JavaScript** handles interactive features like form validation, dynamic content, and user interactions.
  - **EJS (Embedded JavaScript Templates)** is used to generate dynamic web pages and display data from the server.
  - **MongoDB** stores user data such as bookings, User details, and pilgrim information.
  - The project follows a **full-stack architecture**, connecting front-end, server logic, and database for a complete web application.

Key courses taken

- **NPTEL Course:** Software Conceptual Design

Positions of Responsibility

- **Core Member:** NSS Group
- **Team Leader:** Manage the team
- **Training :** Intern and trainee at info era

Languages

- English
- Hindi
